ADVISORY BOARD

I. BARTOŠ
Academy of Sciences
Prague, Czechoslovakia

B.E. CONWAY
University of Ottawa
Ontario, Canada

A.S.G. CURTIS
University of Glasgow
Scotland

A.W. CZANDERNA
Solar Energy Research Institute
Golden, Colorado, U.S.A.

D.D. ELEY
University of Nottingham
England

P.J. ESTRUP
Brown University
Providence, Rhode Island, U.S.A.

J.W. GADZUK
National Institute of Science
& Technology
Gaithersburgh, Maryland, U.S.A.

V.E. HENRICH
Yale University
New Haven, Connecticut U.S.A.

N.I. IONOV
Academy of Sciences
Leningrad, U.S.S.R.

J. KOUTECKY
Freie Universitat
Berlin, Germany

R.M. LATANSION
MIT
Cambridge, Massachusetts, U.S.A.

J.D. LEVINE
Texas Instruments
Dallas, Texas U.S.A.

A.A. MARADUDIN
University of California
Irvine, California U.S.A.

S.R. MORRISON
Simon Fraser University
Burnaby, Canada

K. MULLER
University of Erlangen-Nurnberg
Germany

R. PARSONS
University of Southampton
England

J.B. PENDRY
Imperial College
London, England

S.T. PICRAUX
Sandia National Laboratory
Albuquerque, New Mexico, U.S.A.

T.N. RHODIN
Cornell University
Ithaca, New York, U.S.A.

S. SUGANO
University of Tokyo
Japan

H. TI TIEN
Michigan State University
East Lansing, Michigan, U.S.A.

L. WEISS
Roswell Park Memorial Institute
Buffalo, New York, U.S.A.

R.F. WILLIS
Pennsylvania State University
University Park, Pennsylvania,
U.S.A.

K. ZHANG
Fudan University
Shanghai, People's Republic of China

Publishing, Subscription and Advertising Offices: Pergamon Press, Inc., Fairview Park, Elmsford, New York 10523, U.S.A. and Pergamon Press plc, Headington Hill Hall, Oxford OX3 OBW, England.

Published Monthly: 3 volumes per year, 4 issues per volume. Annual institutional Subscription rate (1991): DM900.00; Two-year institutional rate (1991/92): DM1710.00; Personal subscription rate for those whose library subscribes at the regular rate: DM265.00. Prices are subject to change without notice. Notify 8 weeks in advance of address change with a copy of the subscription mailing label. *Microform subscriptions:* Information available upon request. Subscription rates for Japan include despatch by air and prices are available on application.

SUBJECT INDEX

Atomic structure of kink and interaction with He and C in bcc lattice 357-372
  atom-kink interaction on screw dislocation 365-367
    He atom 365-367
    C atom 367
  bcc crystallite projection on [101] plane 358
  comparison of theories of impurity transport by kinks 371-372
  computational method 359-360
  critical resolved shear stress and 360-365
    initial kink configuration 362
    kink characteristics 360
    kink energy 363-364
  He anc C atom effect on structure of fixed and moving kink 368-371
  migration of atoms in kink on screw dislocation 368

Barriers. See also Full barriers; Partial barriers
  surface polariton transition through, 226-239
    full 226-234
    geometries of 226-227
    partial 226, 234-239

DIDD. See Diffusion-induced dynamic diffusion
Diffusion-induced dynamic diffusion (DIDD) theory, 266, 327-372
  atomic structure of kink and interaction with He and C, bcc lattices, 357-372
    atom interaction with kink on screw dislocation 365-267
(Diffusion-induced...,cont.)
    comparison of theories 371-372
    computational method 359-360
    critical resolved shear stress and 360-365
    fixed and moving kink, structure of 368-371
    migration of atoms in kink on screw dislocation 368
  dislocation core-point defects interaction, bcc lattice, 339-356
    distribution and migration of interstitial atoms in a/2 [111] screw dislocation core 344-356
    interaction of gliding dislocation with vacancies 355-356
  pipe diffusion of 339-344
  impurity atom transport by moving dislocations in crystal surface layer 327-338
    kink balance at surface and bulk 335-337
    kink density 337-338
    by formation of kink on screw dislocation perpendicular to edge 328-338
    images forces and stress on kink 333-334
    by nucleation, surface dislocation segment 327-328
    potential energy in 331-332
    secondary Peirls barrier in 328-333
  straight dislocation core-point defect interaction in bcc lattice 339-356

(Diffusion-induced..., cont.)
distribution and migration of interstitisl He and C atoms in a/2 [111] screw dislocation core 344-356
Dislocation, gliding, interaction with vacancies 355-356
Dislocation core-point defects interaction in bcc lattice 339-356
distribution of interstitial atoms in a/2 [111] screw dislocation core 344-347
C atoms 353, 354
He atoms 344-346
interaction of gliding dislocation with vacancies, Si and He atoms 355-356
migration and, 348-349, 351-355
C atoms 353, 354
He atoms 353-354
pipe diffusion
of insterstitial atom along a [100] edge dislocation 342-344
of point defects along dislocation 339-341
Dynamic pipe diffusion through interfaces. See also Dislocation-induced dynamic diffusion (DIDD) theory; specific experiment

CORROSION SCIENCE

The Journal on Environmental Degradation of Materials and its Control
An Official Journal of the Institution of Corrosion Science & Technology

Editor-in-Chief: **J C SCULLY,** *School of Materials, Houldsworth School of Applied Science, University of Leeds, Leeds LS2 9JT, UK*

Occurrence of corrosion and its practical control is an area of study covering a wide range of scientific knowledge. *Corrosion Science* provides a medium for the communication of ideas, developments and research in all aspects of this field.
The scope of this international journal is very extensive. Published papers range from the highly theoretical to the essentially practical and cover such areas as high temperature oxidation, passivity, anodic oxidation, biochemical corrosion, stress corrosion cracking, and mechanisms and methods of corrosion control.
This journal publishes original papers and critical reviews in the fields of pure and applied corrosion, the degradation of materials, and both surface science and engineering. It forms an important link between metallurgists, materials scientists and all investigators of corrosion and degradation phenomena.

A Selection of Papers
T N RHYS-JONES (UK), Coatings for blade and vane applications in gas turbines.
G RONDELLI, B VICENTINI & A CIGADA (Italy), The corrosion behaviour of nickel titanium shape memory alloys.
F H STOTT, J E BREAKELL & R C NEWMAN (UK), The corrosive wear of cast iron under potentiostatically-controlled conditions in sulphuric acid solutions.
V C NONINSKI (Bulgaria), Corrosion studies with the self-cleaning rotating electrode (SRE).
N R SMART, P M SCOTT & R P M PROCTER (UK), Repassivation kinetics and stress corrosion of mild steel in phosphate solutions.
Y MEAS & J FUJIOKA (Mexico), The determination of the corrosion rate in cathodically protected systems-I. Theory.

Indexed/Abstracted in: *Current Contents, Chemical Abstracts, BMT Abstracts, Corrosion Abstracts, Engng Ind. Monthly & Author Index, INSPEC Database, Metals Abstracts, PASCAL-CNRS Database, Petroleum Abstracts, Aqua Abstr, Cam Sci Abstr, Chem Eng Abstr, Chem Haz in Indus, Edi Metal Abstr, Environ Per Bibl*

INTERNATIONAL JOURNAL OF IMPACT ENGINEERING

Editor-in-Chief: **NORMAN JONES,** *Department of Mechanical Engineering, University of Liverpool, PO Box 147, Liverpool L69 3BX, UK*

The *International Journal of Impact Engineering* publishes original research work concerned with the response of structures and bodies to dynamic loads arising from exposure to blast, collision or other impact events. The topics encompassed by the journal include the elastic and plastic response of structures and bodies to impact and blast loading, terminal ballistics, vehicle crashworthiness, containment and other processes and phenomena in which effects due to impact predominate, such as explosive welding. In addition, related matters such as research into fire hazards in association with impact loads will be included. Every paper accepted must contribute to the understanding of impact phenomena or the insight for engineering design in areas of high rate loading.

A Selection of Papers
G G CORBETT, S R REID & S T S AL-HASSANI (UK), Static and dynamic penetration of steel tubes by hemispherically nosed punches.
N S ABHYANKAR (USA), Flexural waves in beams with geometrical and material longitudinal discontinuities.
H Z ZHONG & C RUIZ (UK), Assessment of damage resulting from missile impact on a spherical shell.
Y TIRUPATAIAH & G SUNDARARAJAN (India), The volume of the crater formed by the impact of a ball against flat target materials - the effect of ball hardness and density.
Z ROSENBERG & J TSALIAH (Israel), Applying Tate's model for the interaction of long rod projectiles with ceramic targets.

EUROPEAN POLYMER JOURNAL

Founder Editor: **M STACEY, FRS,** *University of Birmingham, UK*
Joint Editors-in-Chief: **J C BEVINGTON,** *Department of Chemistry, The University, Lancaster, UK* and **J V DAWKINS,** *Department of Chemistry, The University, Loughborough, Leicestershire, UK*

This journal acts as a medium for the exchange of research in the area of macromolecular substances, both synthetic and natural, and publishes results bearing on the physics or chemistry of polymers. Papers may fall either into the category of original papers dealing with substances of high molecular weight, or that of review articles covering the literature on topical aspects of polymer science and technology. The languages of the journal are English, French, German and Italian; for all papers an abstract is provided, and in the case of the latter three languages the abstract also appears in English translation.

A Selection of Papers
M ACEVEDO, J DE ABAJO & J G DE LA CAMPA (Spain), Curing of nadimide end-capped oligoesters.
I N SHTENNIKOVA, G F KOLBINA, V P SHIBAEV & I V EKAEVA (USSR), Conformational properties of hydroxypropylcellulose-II. Flow birefringence and optical anisotropy of hydroxypropylcellulose macromolecules.
H R KRICHELDORF & B SCHMIDT (FRG), New polymer syntheses-43. Polyamides derived from aryloxy- or arylthioterephthalic acids and aliphatic diamines.
W S CARVALHO & R E S BRETAS (Brazil), Thermoplastic/carbon fibre composites: correlation between interphase morphology and dynamic mechanical properties.
G MEDJAHDI, D SARAZIN & J FRANCOIS (France), Light scattering behaviour of semi-dilute solutions of polyacrylamide.

JOURNAL OF THE MECHANICS AND PHYSICS OF SOLIDS

Editor-in-Chief: **J R WILLIS,** *School of Mathematical Sciences, University of Bath, Claverton Down, Bath BA2 7AY, UK*

The journal brings together and relates research by mathematicians, engineers, metallurgists and physicists on the properties of constructional materials, giving equal coverage to theory and experiment; it is particularly concerned with the development and application of fundamental ideas bearing on the connections between continuum and micro-structural properties of materials and on the solution of practically significant problems.
The scope of the journal is extensive and its main concern is with the physical properties and mechanical behaviour of materials as diverse as metals, soils, glasses and ceramics, rubbers, polymers and composites.

A Selection of Papers
A F BOWER & M ORTIZ (USA), Solution of three-dimensional crack problems by a finite perturbation method.
X MARKENSCOFF & L NI (USA), The singular nature of the stress field near an arbitrarily moving dislocation loop.
G ALPA & L GAMBAROTTA (Italy), Probabilistic failure criterion for cohesionless frictional materials.
T C T TING (USA), Interface cracks in anisotropic bimaterials.
P GUDMUNDSON (Sweden), Anisotropic microcrack nucleation in brittle materials.
W J DRUGAN & Y SHEN (USA), Finite deformation analysis of restrictions on moving strong discontinuity surfaces in elastic-plastic materials: quasi-static and dynamic deformations.

INTERNATIONAL JOURNAL OF PLASTICITY

Editor-in-Chief: **AKHTAR S KHAN,** *School of Aerospace, Mechanical and Nuclear Engineering, The University of Oklahoma, 865 Asp Avenue, Room 212, Norman, OK 73019, USA*
Co-Editors: **JAMES F BELL,** *Department of Mechanics, Johns Hopkins University, Latrobe Hall, Baltimore, MD 21218, USA* and **NICOLAE CRISTESCU,** *Department of Mechanics, University of Bucharest, Str. Academiei, 14, Bucharest 70109, Romania*

The *International Journal of Plasticity* reports original research on all aspects of plastic deformation of isotropic as well as anisotropic solids, including the thermodynamics of plasticity and fracture, continuum theory, and macroscopic as well as microscopic phenomena. The topics of interest include plastic behavior of single crystals and polycrystalline metals, ceramics, rocks and soils, composites and polymers, as well as plasticity aspects of failure and fracture mechanics. Significant experimental, numerical and theoretical contributions advancing the understanding of plastic behavior of solids are most welcome, together with studies relating microscopic to macroscopic behavior of solids. The journal will contain research papers, review articles, research notes, letters to the editor, and announcements of conferences and symposia.

A Selection of Papers
Y TOI & S N ATLURI (USA), Finite element analysis of static and dynamic fracture of brittle microcracking solids. Part 2: stationary and growing macro-cracks under static loading.
J F BELL (USA), Material objectivity in an experimentally based incremental theory of large finite plastic strain.
N OHNO, M KAWABATA & J NAGANUMA (Japan), Aging effects on monotonic, stress-paused, and alternating creep of type 304 stainless steel.
H S SELLERS & A S DOUGLAS (USA), A physical theory of finite plasticity from a theoretical perspective.
K C VALANIS (Canada), Back stress and Jaumann rates in finite plasticity.
A FRANCHI, F GENNA & F PATERLINI (Italy), Research note on quasi-convexity of the yield function and its relation to Drucker's postulate.
